Harvard Medical School has been innovating for more than 230 years, from developing the smallpox vaccine and paving the way for the polio vaccine to transforming the ability to treat cancers and revolutionizing the understanding of how the brain develops. Like their acclaimed predecessors, today’s HMS researchers, trainees, alumni, and students are tackling the greatest health care challenges of our time.

HMS is the epicenter of the largest biomedical research community in the world. Together with our 16 renowned affiliated hospitals and research institutions, we are making breakthroughs that have a tangible impact on how the world understands and treats disease.

“This is the world’s greatest medical school, in the world’s greatest University, deeply embedded with many of the greatest hospitals and biomedical research institutes,” says Jeffrey S. Flier, MD, dean of HMS and the Caroline Shields Walker Professor of Medicine. “Even at Harvard, this pulsing ecosystem of energized people able to educate, innovate, and discover, we cannot fund everything we should—and must.”

On Nov. 13, HMS officially launched The World Is Waiting: The Campaign for Harvard Medicine, a transformative $750 million fundraising initiative that is empowering its mission to alleviate human suffering caused by disease.

“This Campaign is about helping people live longer, healthier lives,” says Flier. “We are using our most effective tools—education, discovery, service, and leadership—to attack disease and address the biggest health care challenges of our time. Both the needs and the opportunities are great. Our success is critical to the health of our children, grandchildren, and indeed the whole human family around the globe.”

Changing Lives
Harvard University President Drew Gilpin Faust says it is a privilege to glimpse the vast dimensions of medicine at Harvard: some 20,000 faculty and students and nearly 10,000 alumni whose new ideas stretch minds and change lives across the world every day, from labs and teaching hospitals in Boston to rural clinics in Liberia.

“Together we can stretch our minds with new ideas, fill the world with new hope, alleviate suffering, and improve human lives,” says Faust, the Lincoln Professor of History.

HMS has raised $396 million toward the Campaign goal as of Dec. 31, 2014, representing gifts and pledges from more than 5,000 alumni, faculty, staff, board members, volunteers, and friends.

“Only bold institutions—willing to do things differently, willing to build on strengths and willing to take risks and create new paths—will meet expectations deserving of even more support,” says Joshua Boger, AM ’75, PhD ’79, campaign chair, member of the HMS Board of Fellows, and founder and former CEO of Vertex Pharmaceuticals.

“Today, in every building; down every hallway; in every lab, I see young medical and research students dreaming what I dreamed,” says Flier, recalling his days as a young researcher at the National Institutes of Health. “In many cases, all they need is one person with the resources to help. You can be that person.”

ENDOWED PROFESSORSHIP CELEBRATIONS
The following newly established professorships at Harvard Medical School have been celebrated during the early stages of the Campaign, from July 1, 2011, through Dec. 31, 2014.

Mary Ellen Avery Professorship in Pediatrics in the Field of Newborn Medicine
Brigham and Women’s Hospital

Henry Knowles Beecher Professorship in Anaesthesia
Massachusetts General Hospital

Shlomo Ben-Haim, MD, Professorship in Medicine in the Field of Cardiac Electrophysiology
Beth Israel Deaconess Medical Center

Bertarelli Professorship in Translational Medical Science
Harvard Medical School

Denise and David Bunning Professorship in the Field of Allergy and Immunology
Boston Children’s Hospital

Children’s Hospital Boston Professorship in Pediatric Immunology
Boston Children’s Hospital

Concordia Professorship in Pediatrics
Boston Children’s Hospital

R.J. Corman Professorship in Medicine
Dana-Farber Cancer Institute

William Cox Family Professorship in Psychiatry in the Field of Addiction Medicine
Massachusetts General Hospital

Harvey W. Cushing Professorship in Neurosurgery Established by the Daniel E. Ponton Fund
Brigham and Women’s Hospital

Solman and Libe Friedman Professorship in Ophthalmology
Massachusetts Eye and Ear

Gorman Brothers Professorship in Medicine
Beth Israel Deaconess Medical Center

Stelios Evangelos Gragoudas Professorship in Ophthalmology
Massachusetts Eye and Ear

Elizabeth D. Hay Professorship in Cell Biology
Harvard Medical School

John Hedley-Whyte Professorship in Anaesthesia
Beth Israel Deaconess Medical Center

Hutter Family Professorship in Medicine in the Field of Cardiology
Massachusetts General Hospital

Kurt J. Isselbacher Professorship in Medicine in the Field of Gastroenterology
Massachusetts General Hospital

Miriam Sydney Joseph Professorship in Neurology
Brigham and Women’s Hospital

Philip and Aya Leder Professorship in Genetics
Harvard Medical School

Leftenfeld Professorship in Otolaryngology
Massachusetts Eye and Ear

Robert R. Linton, MD Professorship in Surgery in the Field of Vascular and Endovascular Surgery
Massachusetts General Hospital

Longwood Professorship in Pediatrics
Boston Children’s Hospital

Nancy Lurie Marks Professorship in the Field of Autism
Massachusetts General Hospital

Mathiesen Family Professorship in Surgery in the Field of Thoracic Surgery
Massachusetts General Hospital

McNeil Family Professorship in Health Care Policy
Harvard Medical School

Neskey Family Professorship in Emergency Medicine
Brigham and Women’s Hospital

Daniel K. Podolsky Professorship in Medicine
Massachusetts General Hospital

Leonard D. Schaeffer Professorship in Health Care Policy
Harvard Medical School

Elisabeth R. Spallin Professorship in Psychiatry in the Field of Addiction Medicine
Massachusetts General Hospital

Asa and Patricia Springer Professorship in Structural Biology
Boston Children’s Hospital

Thurl Family Professorship in Radiology
Massachusetts General Hospital

Warshaw Family Professorship in Surgery
Massachusetts General Hospital

J. David and Virginia Wimberly Professorship in Neurology
Brigham and Women’s Hospital
