

High-throughput chemical and RNAi screening:

Methods, Resources and Applications

SPECIAL SYMPOSIUM

Monday, May 16 | 1:00 - 5:30 PM
Armenise Amphitheater
Harvard Medical School
200 Longwood Avenue, Boston

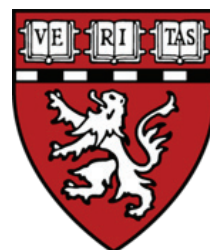

This symposium will feature a number of brief talks outlining high-throughput screening technologies and resources –including funding opportunities– available throughout the Harvard University community.

Facilities represented include:

- HMS ICCB-Longwood Screening Facility
- HMS Drosophila RNAi Screening Center
- Harvard Stem Cell Institute Therapeutic Screening Center
- Broad Institute Chemical Biology and RNAi Platforms
- Harvard NeuroDiscovery Center Laboratory for Drug Discovery in Neurodegeneration (LDDN)

There is no cost to attend this symposium,
but registration is recommended.
Please send your name, contact information,
and home department and institution to:
